PACS JUST DROP TO PLANTTM

Our Seed Pacs are great for planter pots and flower gardens, or toss randomly and let rain handle the rest. They are convenient for busy people, new gardeners, small-space and urban environments, pollinator lovers and land restoration. No more digging or transporting heavy bags of soil. Just drop the Pac where plant growth is desired, water and watch as the outer Pac dissolves away. The nutrients inside each Pac provide the seeds the best opportunity to grow in a variety of soil conditions. We provide non-GMO, neonicotinoid free seeds, which are heirloom whenever possible.

Benefits

- Simple to start a garden -> All necessary nutrients included
- Place Pacs where plants are desired -> Drop Pacs on ground
- Increased germination success -> Less wasted seed
- Increased growth and vigor -> Faster plant establishment
